```
--- Testing Airplane Class ---
Works: Departure Time is 10:00 AM
Works: Flight Number via Getter is SQ123
Works: Destination is Cairo

The flight is delayed by 30 minutes.

--- Testing Library System ---

Java Assignment: Airplane & Library System

Prepared for study/review

```
import java.util.ArrayList;

// --- Question 1 Classes ---
class Airplane {
    private String flightNumber; // Private: Access via getter only
    String destination;          // Default: Access within same package
    public String departureTime; // Public: Access from anywhere

    public Airplane(String flightNumber, String destination, String departureTime) {
        this.flightNumber = flightNumber;
        this.destination = destination;
        this.departureTime = departureTime;
    }

    public String getFlightNumber() {
        return flightNumber;
    }

    public void delayFlight(int minutes) {
        System.out.println("The flight is delayed by " + minutes + " minutes.");
    }
}

// --- Question 2 Classes ---
class Book {
    public String title;
    public String author;
    private double price;

    public Book(String title, String author, double price) {
        this.title = title;
        this.author = author;
        this.price = price;
    }

    public void updatePrice(double newPrice) {
        this.price = newPrice;
    }

    public void displayInfo() {
        System.out.println("Book: " + title + " | Author: " + author + " | Price: $" + price);
    }
}

class Library {
    private ArrayList<Book> books = new ArrayList<>();

    public void addBook(Book book) {
        books.add(book);
